PROFILE

Dynamic IT professional with extensive experience in co-owning and managing a successful computer and smartphone store while we also oversee external companies for IT Support. I oversee technical support, sales, and customer service, providing expert assistance for a wide range of devices. Skilled in diagnosing and repairing computers and smartphones, and offering personalized technical support. In addition to my technical expertise, I also possess Web development skills, creating responsive and user-friendly web applications using HTML/CSS, JavaScript, React.js, Nexts.js and WordPress.

WORK EXPERIENCE

Co-Owner

Peter Computers 2012 - Present

- Responsible for sales and after-sales support
- Troubleshoot and repair computers , smartphones and other related devices
- Create online and local back up solutions for customers
- Provide technical Support for software and hardware
- Constantly working under pressure to meet Client deadlines
- Building Network solutions for devices like computers, printers, WiFi and more

Web development Projects

PracticeCyprusExams.com - Full Stack Web App (Next.js)

Independently designed, built and published a SaaS platform that helps users prepare for Cypriot Government exams for A7 and A8 levels. The web app features:

- AI Powered answer/explanations integrated via Chatgpt API
- Payment integration with Stripe API
- User authentication with Google and Facebook
- Vercel and Google views and traffic tracking
